CONTENTS

Volume 30 Number 1 February 1995

1 Review: Perceived texture: direct and indirect methods for use in product development *Frances R. Jack, Alistair Paterson & John R. Piggott*

13 New strategies for kiwifruit processing *R. J. Steele & R. L. Johnson*

23 Effect of ultrafiltration on concentrated apple juice colour and turbidity *Diana T. Constenla & Jorge E. Lozano*

31 Colour and texture changes during sterilization of packed ripe olives *Concepción Romero, Pedro García, Manuel Brenes & Antonio Garrido*

37 Modelling the effects of peanut flour, feed moisture content, and extrusion temperature on physical properties of an extruded snack product *Witoon Prinyawiwatkul, Larry R. Beuchat, R. Dixon Phillips & Anna V. A. Resurreccion*

45 Effect of cooking on nitrate in dehydrated soups *Mercedes Garcia-Mata, Nieves Bosch-Bosch & M. Luisa Perez-Rodriguez*

49 Water vapour permeability of edible bilayer films of wheat gluten and lipids *Nathalie Gontard, Sylvie Marchesseau, Jean-Louis Cuq & Stéphane Guilbert*

57 Use of polysorbate 80 to reduce cholesterol in dehydrated egg yolk *Adamantini Paraskevopoulou & Vassilis Kiosseoglou*

65 Yield and storage stability of patties from pre-rigor beef previously dipped in potassium sorbate and ginger solutions *C. Negbenebor, Y. Balami & J. Igene*

71 Effects of sporulation media and strain on thermal resistance of *Bacillus cereus* spores *Margarita Mazas, Isaac González, Mercedes López, Jesefa González & Roberto Martín Sarmiento*

79 Book reviews

Volume 30 Number 2 April 1995

119 A review of protein engineering for the food industry *P. W. Goodenough*

141 Enhanced accumulation of toxic compound in yeast cells having high glycolytic activity: a case study on the safety of genetically engineered yeast *Tomoko Inose & Kousaku Murata*

147 Changes of soy protein under ultra-high hydraulic pressure *Noboru Kajiyama, Seiichiro Isobe, Kunihiko Uemura & Akinori Noguchi*

159 The proteolytic activity of the crude enzyme extracts of Baltic cod (*Gadus morhua*) alimentary tract *Ilona Kołodziejska, Anna Marcinkowska & Magdalena Karamać*

167 Freezing tilapia by airblast and liquid nitrogen – freezing point and freezing rate *Yau-Ling Chen & Bonnie Sun Pan*

175 Effect of packaging films on storage stability of intermediate-moisture deep-fried mackerel *Yaakob B. Che Man, Jamilah Bakar & Ahmad A. K. Mokri*

183 Effect of surfactants and drying rate on barrier properties of emulsified edible films *Frédéric Debeaufort & Andrée Voilley*

191 Kinetics of aseptic concentrated orange juice quality changes during commercial processing and storage *Dorit Rassis & Israel Sam Saguy*

199 Evaluation of diffusion coefficients in osmotic concentration of bananas (*Musa Cavendish* Lambert) *Maria Aparecida Mauro & Florencia Cecilia Menegalli*

215 Firmness, seed wholeness and water uptake during the cooking of lentils (*Lens culinaris* cv. *anicia*) for 'sous vide' and catering preparations *Patrick Varoquaux, Pierre Offant & Françoise Varoquaux*

221 Bacterial population dynamics and decay on leaves of different ages of ready-to-use broad-leaved endive *Marie-Agnès Jacques & Cindy E. Morris*

237 Book reviews

Volume 30 Number 3 June 1995

263 Review: Effect of thermal processing on soymilk *Kin-Chor Kwok & Keshavan Niranjan*

297 A nutritional, chemical and sensory evaluation of lupin (*L. angustifolius*) tempe *N. Fudiyansyah, D.S. Petterson, R. R. Bell & A. H. Fairbrother*

307 Determination of total solids in dairy products using the microwave-oven method *Magdalena Fernandez Marquez, Belen Garcia-Villanova Ruiz & M. A. Dolores Ruiz-Lopez*

311 Influence of temperature on crystallization of lactose in ice-cream *Yoav D. Livney, Daniel P. Donhowe & Richard W. Hartel*

321 Effect of ascorbic acid on the foaming and gelling of globular proteins *Nazlin K. Howell & Claire Taylor*

335 The effect of use of freeze-thawed pork on the properties of Bologna sausages with two fat levels *Francisco Jiménez Colmenero, Jose Carballo & Maria T. Solas*

347 Finite element analysis of heat conduction in lasagna during thermal processing *Bart M. Nicolaï, Peter Van den Broek, Mia Schellekens, Guido de Roeck, Toon Martens & Josse De Baerdemaeker*

365 Storage characteristics of sous vide cooked roast beef *Tina B. Hansen, Susanne Knøchel, Dorte Juncher & Grete Bertelsen*

379 Postharvest quality of pH of *Fusarium* inoculated red-ripe tomatoes stored under controlled atmospheres *John C. Beaulieu & Mikal E. Saltveit*

391 Fresh plant tissue softening by means of an immobilized soluble-insoluble endopectinlyase *Caterina Dinnella & Gaetano Lanzarini*

397 Distillation-extraction of styrene migrating from polystyrene containers to foods by gas chromatography *Oi-Wah Lau, Man-Tung Lung & Chun Shing Mok*

405 Optimization of a ham formulation *Lance R. Broad & Antony M. Fayerman*

Volume 30 Number 4 August 1995

415 Electropalatography in the study of tongue movement during eating and swallowing (a novel procedure for measuring texture-related behaviour) *Frances R. Jack & Fiona Gibbon*

425 Two-film theory of flavour release from solids *Bryan P. Hills & Marcus Harrison*

437 Magnetic resonance imaging of fat and muscle distribution in meat *Jerry M. Tingle, James M. Pope, Paul A. Baumgartner & Vasil Sarafis*

447 Use of magnetic resonance imaging to study the binding of manganese ions in brine-cured pork *Thierry M. Guiheneuf, Suzanne L. Duce, Stephen J. Gibbs & Laurance D. Hall*

461 Ohmic heating of Japanese white radish *Rhaphanus sativus* L. *Tetsuya Imai, Kunihiko Uemura, Nobuaki Ishida, Shigery Yoshizaki & Akinori Noguchi*

473 A model food system for mass transfer in the acidification of cut root vegetables *Isabel C. A. Azevedo & Fernanda A. R. Oliveira*

485 Shear forces for dehulling, splitting and breaking raw and pretreated pigeonpeas *Prabhakar S. Phirke, Nivrutti G. Bhole & Sudhakar H. Adhaoo*

493 Effects of formulation and processing conditions on easily extractable lipid and nitrogen components of wheat sourdoughs *Concepción Collar & Claudia S. Martínez*

505 Formulation and rheological characterization of reduced-calorie food emulsions *Bruno de Cindio & Domenico Cacace*

515 Growth of the psychrotrophic pathogens *Aeromonas hydrophila, Listeria monocytogenes* and *Yersinia enterocolitica* on smoked blue cod (*Parapercis colias*) packed under vacuum or carbon dioxide *R. Graham Bell, Nicholas Penney & Sandra M. Moorhead*

523 Use of *Photobacterium leiognathi* in studies of process equipment cleanability *Gun Wirtanen, Vesa Nissinen, Leena Tikkanen & Tiina Mattila-Sandholm*

535 Letter to the Editor

539 Book reviews

Volume 30 Number 5 October 1995

555 Review: Current methods to evaluate contribution and interactions of components to flavour of solid foods using hard cheese as an example *Conor M. Delahunty & John R. Piggott*

571 Ability of neonatal human *Lactobacillus* isolates to remove cholesterol from liquid media *Valeria M. Marshall & Elizabeth Taylor*

579 Effect of formulation on protein breakdown, *in vitro* digestibility, rheological properties and acceptability of tarhana, a traditional Turkish cereal food *Senol Ibanoglu, Paul Ainsworth, George Wilson & George D. Hayes*

587 Heat-resistant fungi in Nigerian heat-processed fruit juices *Jason A. N. Obeta & J. Obeta Ugwuanyi*

591 Fatty acid composition of the total, neutral and phospholipids of pond-raised Brazilian *Piaractus mesopotamicus* *Everardo Lima Maia, Delia B. Rodriguez-Amaya & Luiz K. Hotta*

599 Improved water resistance in edible zein films and composites for biodegradable food packaging *Kohji Yamada, Hidekazu Takahashi & Akinori Noguchi*

609 Mechanical strength and rheological behaviour of barley kernels *Praveen C. Bargale & Joseph Irudayaraj*

625 Influence of large solid spherical particles on the residence time distribution of the fluid in two-phase tubular flow *Paulo N. Baptista, Fernanda A. R. Oliveira, Luís M. Cunha & Jorge C. Oliveira*

639 An NMR pulsed field gradient study of the electrical and conventional heating of carrot *Andrew G. F. Stapley, José A. Sousa Gonçalves, Michael P. Hollewand, Lynn F. Gladden & Peter J. Fryer*

655 Rapid moisture and fat determination by pulsed NMR for monitoring drying and coating processes of extrudates *Armel Davenel & Philippe Marchal*

663 The effect of ionizing radiation on the CIELAB colour co-ordinates of chicken breast meat as measured by different instruments *Samuel J. Millar, Bruce W. Moss, Douglas B. MacDougall & M. Hilary Stevenson*

675 Commentary on 'Optimization of experimental parameters for the EPR detection of the cellulosic radical in irradiated foodstuffs' *Marc Desrosiers, Debra Bensen & Deanna Yaczko*

681 Letter to the Editor – EPR detection of irradiated food

683 Book reviews

Volume 30 Number 6 December 1995

693 Review: Phase separated, glassy and rubbery states of gellan gum in mixtures with food biopolymers and co-solutes *Stefan Kasapis*

711 Position paper: Towards predictive microbioligy in frozen food systems – a framework for understanding microbial population dynamics in frozen structures and in freeze–thaw cycles *Geoffrey P. Archer, Christopher J. Kennedy & Ashley J. Wilson*

725 Continued inhibitory effect of carbon dioxide packaging on *Listeria monocytogenes* and other microorganisms on normal pH beef during abusive retail display *Sheryl M. Avery, Andrea R. Rogers & R. Graham Bell*

737 High pressure and pasteurization effect on duck foie gras *Abdelhamid El Moueffak, Christian Cruz, Monique Antoine, Michel Montury, Garard Demazeau, Alain Largeteau, Bernadette Roy & Francois Zuber*

745 Estimation of confidence interval of pasteurizing values of conduction-heated *Sous Vide* food in a combination oven *Guozhong Xie & Michael A. Sheard*

757 Effect of irradiation and chilled storage on the microbiological and sensory quality of a ready meal *Nicola J. McAtter, Irene R. Grant, Margaret F. Patterson, M. Hilary Stevenson & S. T. Colin Weatherup*

773 Effect of emulsifier type and homogenization temperature and pressure on physical properties of peanut extract *Ismail Y. S. Rustom, Miguel H. López-Leival & Baboo M. Nair*

783 Tristimulus colour measurement of rooibos tea extract as an objective quality parameter *Elizabeth Joubert*

793 Spectrophotometric determination of single synthetic food colour in soft drinks using ion-pair formation and extraction *Oi-Wah Lau, Meggy M. K. Poon, Siu-Cheung Mok, Fanny M. Y. Wong & Shiu-Fai Luk*

799 Physical measurement of the quality of fresh scad (*Trachurus trachurus*) and rainbow trout (*Oncorhynchus mykiss*) during ice storage using the RT Freshmeter *Paulo Vaz-Pires, Isabel Araújo & Roy M. Kirby*

807 Kinetics of sunflower oil contamination with polycyclic aromatic hydrocarbons from contaminated recycled low density polyethylene film *Peter Šimko, Viera Khunová, Peter Šimon & Miroslava Hrubá*

813 Studies on the electrostatic interactions of lysozyme with α-lactalbumin and β-lactoglobulin *Nazlin K. Howell, Nana A. Yeboah & David F. V. Lewis*

825 Book reviews

835 Erratum
